EDITOR'S NEWSLETTER, GOSSIP, ETC.

For May 1979.

YES, I KNOW, we are a month behind. That's due to COST, again.
But it is sometimes beneficial that way-as we are revealing
what had happened in May.

Talk about news and other floods of information STILL pouring
into CNK, it's really out of this world. It's really amazing
just what IS going on out there in the world, when we are all
stuck here safe in our armchairs (well, at least some of us are).

My apologies to all those experts in the English language who
are putting tiny red circles around all my mistakes in CNK-I am
still blaming the typewriter-it is definitely NOT me! It can't
spell either.

As you all know, this magazine is folding up in December while
I recap the whole situation. Some people, especially in the U.S.A
have been asking for my support or listings for their books etc.,
well I have NOT replied because it is not worth it now. I hope
they read this.

Although CNK folds up this year, I have had an idea to still
produce CNK, but in other languages. This is being done mainly
for practise, on my part, and also that CNK will only run to
about 25 copies in these languages. Also it will only appear
about twice a year in Europe only. No CNK copies will be sent
out to England or the U.S.A etc. I will hope therefore people in
Germany, Italy, Switzerland, and other European states, will
continue to send me their exchange journals. Then, should CNK
restart again for English readers, I will have some good data
and perfect (near perfect) translations. IF anybody in England,
etc., wants a copy in these languages, please let me know-but
it will cost you extra, for the extra work involved to run extra
copies. The issue numbers will remain the same, however.

BEAUTY CONTEST FOR CNK

Come on now, all you young ladies out there reading this. How a-
bout a bit of fun, to close down CNK? We want any young lady
who thinks she knows what the smart girls of the year 2000 will
be wearing and pose for a photo, which you yourself will have
to take(preferably in black and white, as colour simply does not
reproduce very well), and then send it in to us with £1.50, which
is the entrance fee and will be the PRIZE MONEY. It is based on
winner takes all the cash, whatever it is, in the kitty at the
time. So far, we hope to have at least TWO entrants for this

by August. They are, former . Carnival Queen, miss Teresa Garven, and Mrs. Sue Read, who was also a former model. Runners up will receive free copies of CNK for life, or the life of CNK, that is or free books on the subjects covered in this magazine. Runners up will also receive my books OUR WEIRD UNIVERSE, which is due for publishing in the summer of this year. (What summer-do I hear you say??) So come on girls. All you have to do is wrap yourself up, OR unwrap yourself down, in anything futuristic, take a photo in black and white and send it in to us by the end of August 1979. The more who enter, the more prize money to be won. We will let readers know the state of the contest in future issues. Readers will be asked to judge photos appearing of the girls, and let us know the winners. This is NOT a lottery, or gambling-purely a bit of fun to see us into the 21st Century. Pin your photo on a sheet of paper, enclose the fee, ADD YOUR NAME AND ADDRESS IN BLOCK CAPITALS otherwise you will be lost, and post. That's all you have to do. The winners photo will be published either on the front or back covers of this magazine. AND GOOD LUCK! TIPS: You may use anything that comes to hand, including tin foil, strange headgear or whatever turns your imagination/8th the spiral towards current trends in the year 2000. WHO KNOWS, your creation may hit the Paris fashion shows. Who knows who reads CNK, and who knows who will get picked for a modelling job because of it!

THIRTY COPIES of CNK were sent out to Malaysia last month. This is our biggest boost since we began publishing in 1972 under this title.

From the above magazine there followed this article in 1973:
UFO'S - A SCIENTIFIC DEBATE. By Ian Ridpath.

Bøger om ufo'er plejer ikke at være særligt dybtgående. Når de er bedst er det et værk lavet af en mand, der forsøger at belyse et meget bredt og kompliceret område (f.eks. Allen Hynek: The Ufo Experience) eller fra en gruppe, der ikke tager så meget til indtægt som den kunne (Condon-kommissionen). Men når de er værste, er de tendentiøse journalistik af den værste slags. For at undgå disse faldgruber har professor Sagen og Page samlet materiale fra en journalist, en sociolog, en psykolog, to psykiatere, fysikere og astronomer (mest de sidste). De forskellige bidrag til bogen blev først præsenteret på et symposium ved The American Association for the Advancement of Science (Den amerikanske sammenslutning for videnskabens fremme).

UFO's - a scientific Debate begynder med en liste over indsamlede ufo-sager, adskillige der, ifølge mit kendskab, ikke har været tilstrækkeligt modbevist i Condon-rapporten eller andetsteds. Disse sager er mellem de talrige eksempler bidragyderne henviser til.

Det mest originale indslag er et foredrag om usaedvanlige radarekkoer, film af ufo'er i bevægelse, og de komplicerede sociale og psykologiske aspekter af ufo-sagen, der har været så hurtigt ignoreret før i tiden. Ant-ufo feltherren, Donald Menzel bringer en liste med fænomener der kan forklare de fleste ufo'er. Allen Hynek beskæftiger sig med se sager hvor kendte fænomener ikke ser ud til at kunne forklare noget.

En videnskabsmand, med atmosfæriske forhold som speciale, James McDonald, udtrykker tydeligst sin tro på at der er noget om ufo-problemet. Men andre, f.eks. astronomen William Hartmann, mener at omhyggelige undersøgelser og bedre data vil medføre en fornøftig forklaring på alle sager. I to glimrende, supplerende kapitler, lader Carl Sagen og Philip Morrison de observation-mæssige beviser være, men lader gassen gå af den ikke-jordiske hypotese vedrørende ufo'erne.

Konklusion? Drag Deres egen, men beundrer AAAS' mod ved at afholde et sådant velafbalanceret symposium. Sober læsning for både entusiaster og skeptiker. Kilde: New Scientist, 22 March 1973.

Letters

Some recent letters from CNK readers.

From Martin Dawson. York Astronomical Society:

Hullo Ed., Martin again, You know this UFO debate farce in the House Of Lords, well I did not like it. So I wrote a letter to this so-called parliament, and this is how it went: "After listening to the debate on UFO's in the House of Lords, I was appalled at the response to Lord Clancarty's motion. How can the government dismiss this subject as a joke, and, after the way they treated it, that's all it was.

I think the people of this country should know, after all, it is them who vote their members of parliament into their various constituencies. So please, let's have a better deal for our money".

Now that was on the 30th Jan., and on the 13th February, I received a photocopy through my door, from the Parliamentary Commissioner: "Dear Mr. Dawson, I have been asked to reply to your letter of 30th January addressed to this office. I enclose a leaflet which explains in broad terms what the Parliamentary Commissioner (also known as the Ombudsman) can and cannot do. From this you will see he can investigate complaints of maladministration by the government departments and authorities listed in Annex A when requested to do so by Member of the House of Commons. The commissioner has no other duties and in these circumstances I am afraid there is no action he could take on your letter even if it were referred to him by a Member of Parliament.

I am Sorry I can only send a disappointing reply.

Yours sincerely, P.J. Smail."

Also on the 9th of January I wrote to the Yorkshife Evening Press which was published on 16th January. I received a call from a man about my letter, which was against UFO's and by going by the heading you would think it so. (Because a lot of people I know say they have seen a meteor thinking it was a UFO, so in an attempt to educate folks I wrote this letter). He asked me such a lot of questions, so I found out his name and address so I'll check him up in one of Kelly's dictionaries, because if he does not exist, it could be a case of the M.I.B. or a M.O.T. (Man on the telephone).

No, I didn't like the way that debate was conducted and Lord Clancarty was treated wrongly, and if we UFOlogists do not give him the help he deserves then we have lost a great

chance in getting ufo's accepted. That Lord Trefgarne is in black book, and come that glorious day...and that goes for Lord Davies as well. However the Earl of Kimberley seems to be on the right side...and to compare angels with ufo's, Jesus wept! There are some thick people about!

I hope you write some of this letter in CNK as I think it has something to contribute. oh yes, also, look at that picture on page 18 of CNK 21, that is not Venus, and I will tell you why. 1) You never see Venus present a full phase to Earth... 2). You never see Venus with stripes on, unless it is a photo taken in ultra-violet light by Mariner 10, a lot nearer to Venus than Earth...3) A blurred image would be the only way to show Venus as a disc in an instrument that does not show much, even then not with stripes or bands...4) High flying birds do not fly so close together that they look like a disc of light, never, they would have to be so high up, that they would die through lack of oxygen. Some so called 'experts' speak such a lot of bullcome that they must be let out of some asylum. Yes, there was something flying over New Zealand that was not of this Earth...

What did I predict in my last Newsletter, and I quote: "BECAUSE IF THE BBC DON'T DO SOMETHING ABOUT IT SOME OTHER CHANNEL WILL." and the other night at a meeting of the York Astronomical Society I was given a newspaper cutting saying ATV is to make a series and I quote: "HE WILL (DR. SIMON MITTON) START A SERIES OF SEVEN 30-minute ASTRONOMY PROGRAMMES, CALLED 'BEYOND THE MOON', IN APRIL." Need I say more.. Martin Dawson.

*Phew, what a long letter Martin-are you trying to take over CNK? Sorry for its delay in publication, but yes, it does contribute to science. As for 'BEYOND THE MOON' ATV, I think it is very well presented, full of facts about space and time. Martins newspaper write up was as follows:

UFO?-- JUST A METEOR. In the light of the recent sightings of UFO's in Italy and New Zealand, your readers might like to know that at the moment the Earth has just passed through a ~~swarm~~ of meteoroids called the 'Quads' or to give them their proper name - Quadrantids. Every so often the Earth passes through a swarm of stones in space, and every January it meets up with these. The untrained eye can mistake such showers, especially if it is a fire ball which is a bigger meteor, for a UFO. So if you look up and see a fast moving point of light in a flash, it's only a meteor. Martin Dawson, 16 Melton Drive, Bishopthorpe, York, YO2-1RW.

The York Astronomical Society's photos have yet to be published. FROM Crystal Hogben of MAGIC SAUCER : (in part)

Dear Ed,

I really like CNK. There is loads of news in it, all very interesting and I like your running commentary remarks, etc. (I have hysterics sometimes). Also I'm really impressed with your translations. Magic Saucer ought to think about translating into other languages, We do hope to continue after 1979, most definitely. I was surprised to see the metaphysical articles-but pleased too. I am sure we shouldn't close our minds to these subjects. They must be connected with Ufology otherwise so many ufologists wouldn't explore them. (I've explored some of them too). I particularly like CNK's policy because you admit that you cannot find answers. Resraoh does seem useless. I feel like this too. People put such a lot of effort into e.g. investigations, thinking they are going to learn something, but I don't think they do. They just make an industry out of it. (I shouldn't say that, as my husband does investigations-but he knows what I think anyway). Sometimes you can learn far more if you just take it easy and enjoy watching what goes on. As you say, some children make things up to see their names in print. We thought about that too. That's one reason we have a fiction section so they CAN make things up. We investigate local sightings when we can; and like in the case of the Franche sighting the youngsters finished the investigations as it was a sighting by a boy their age. They don't stand no nonsense, kids have got a lot of sense and usually know which other children are genuine and which ones mess about. Of course, nobody's infallible. All the best, Crystal Hogben. May 26th 1979 -

CNK RUFFLES THE 'FEATHERS' OF THE AETHERIUS SOC.

Dear Mr. Harris, Thank you for sending us the April issue of CNK which we have read with interest. However, I must point out that your presentation of the Aetherius Society was very unfortunate to say the least. I think that it is very good idea for you to investigate groups who are in the practice and teaching of metaphysical sciences, before printing anything in your magazine.

The Sun newspaper published an article which on the whole was fairly accurate. However, you openly state to your readers "although I agree this happens due to the CONCENTRATED mass of people sending out waves of telepathic energy to bring about normal vibrations in a sick person, I still do not believe a mefe cardboard battery used by the Aetherius Society will hold etheric energy". I think that every member of the A.S. from Dr.G. King, downwards would agree with you 100%. In fact, all students of metaphysics

throughout the world would agree with your statement. It is really unfortunate that you did not investigate the radionic principle of OPERATION PRAYER POWER before you made your statement public. Dr. G. King is a metaphysical scientist and apart from being a Master of Yoga in his own right, he is also an expert in the science of radionics. To suggest therefore that he would have people perform a particular ritual in order to charge a cardboard box is something of an insult to him. The construction of the Spiritual Energy Battery which is used in OPERATION PRAYER POWER is highly classified as far as the general public is concerned. I can state quite categorically that the materials and circuitry of this battery includes pure metals and other substances which take hours to prepare because of the extremely high specifications.

May I suggest that in your next issue of Cosmology Newslink, you allow us to put the record straight so that your readers would not conclude that whilst we have got it together regarding flying saucers, etc., we are not that inane to try and charge a cardboard box with spiritual energy.

For your further information I enclose a relevant literature regarding OPERATION PRAYER POWER, including the announcement of a public charging session in North Devon on June 30th, 1979.

Apart from this point, your magazine makes intelligent reading. Keep up the good work. Yours sincerely, Ray Nielsen. Publicity Dept.

* On reflection, I have remembered stories of ghosts being seen doing battle centuries after they have died etc. This is now believed to be caused by the etheric energy left in the surroundings because the fighting had been so intense that the dying people's thought waves impinged themselves in the rocks, ground etc. Now this analogy could be put to the Aetherius Society's OPERATION PRAYER POWER. If enough people concentrate at a given moment in a chosen place, they could well 'charge up' a hilltop with some form of radiated energy. Weather conditions will release this at a later date. As to the 'cardboard box battery', I had read somewhere that this is what it was made of. If Ray Nielsen says it is NOT made from cardboard, then he knows. It is therefore PROBABLY that thought waves could be stored either indefinitely in this battery, or for a short period. As to RADIONICS, I could not find it in my dictionary, but there is such a science, and I guess it must be to do with radiation of energy of some sort. I don't believe however, for one moment that the Aetherius Society are using SPIRITUAL energy, but something given off by all human whilst we are alive! One day we will know for sure what this energy is. - Editor.

Further to page 12... Maybe when that energy is released by the weather conditions, all we will see is a group of people, namely the Aetherius Society, standing there concentrating. (That is if the hilltop receives the 'transmissions'). This ends CNKs look into this aspect of the subject. In future issues we look at what has been already scientifically done in metaphysics.

*Embracing the above subject, we pointed out that the A.S. was using the wrong mantra. Here's a letter from Ed. O'Hare our Harlow Correspondent; which may answer this question:-

Hi Ed, Hope you are keeping well. Many thanks for your usual 23 'Cosmology Newslink'. As for Dr. Geo. King write up page 25, HE COULD BE RIGHT IF THE MANTRAS IS USED FOR GOOD. Attached to this you will find some notes from the book of Dr. T. Lobsang Rampa-WISDOM OF THE ANCIENTS. Many thanks for all ~~the~~ Good luck to you, will try to see you someday. Best wishes. Ed. O'Hare

*Ed. O'Hare being Irish, he would naturally be interested in subjects of mystery. Here's his notes:- MEANING OF THE MANTRA by Lobsang Rampa.

ACTUALLY A MANTRA is a particular name for God, but by common useage it is now taken to mean something else; it is a form of prayer. It is the repetition of something sacred whereby one gains power. If one repeats a mantra conscientiously and reverently one attains to purification of thought.

A Mantra should only be used for good, never for bad, for there is an old saying that 'He who digs a grave for another may fall into it.' Thus it is that Mantras should only be used for good. They should only be used unselfishly and to help others. In the christian Bible it is stated that faith moves mountains; the same could be said about a Mantra. A Mantra used properly has very strong effects and the more it is used the more it builds up power.

Here is a simple illustration of how it builds up power: A violinist can play a certain note on a violin. If he just touches on the note, he only makes a sound. But if he keeps on at the same note he can cause a glass to shatter and crumble. Because playing on that note has induced a vibration in the glass which eventually becomes more than the elasticity of the glass can

handle, and so the glass breaks. In the same way a Mantra increases the vibration for good or for bad. BUT WHEN USED FOR BAD IT OFTEN TURNS ON THE ONE WHO UTTERS IT. One mantra, or sacred invocation is 'OM MANI PADMI HUM' or as the indians say 'RAM RAM RAM'. It should be realised that all sounds and words can influence matter, can even influence inanimate objects. Probably everyone has heard of the statement, 'Mind over matter', well it is correct. Mantras influence matter according to the thoughts of the human mind.

*So now you all know, if you didn't already! I was one who knew only half of it. Thanks Ed.!--Editor.

FROM FORESIGHT:

Dear Edward, we noticed the new look to CNK, to embrace more subjects and cover a wider field. In the long run it's very difficult to avoid psychic and metaphysical phenomena. We read the House of Lords debate in its entirety which was very revealing. We were also in contact with NASA about some strange objects photographed on the moon, asking for explanations. This request was ignored, although the letter was answered. This convinces me all the more that there is something going on on the moon, perhaps of an alien technology, but of which NASA is fully aware. (Editor's interruption: By authorities keeping silent to all requests like this, might be their way of actually saying 'yes you were correct, and our silence is proving it!'). We would agree with the implications in some of your comments in CNK that many Light Centres are trying to emulate the Bible, putting out literature in Biblical terminology and abstractions to which no-one can relate. We have said this time and time again in FORESIGHT. Hopefully it will change. There is no doubt that we have reached the New Age. There is no doubt that the suspot activity due to reach its peak in 1980 will have a profound effect upon the world and the people in it. And the Jupiter Effect from 1982 to about 1986 will have an even greater effect upon the planet and the minds of men.

In the final analysis the spiritual path and psychic development is the only thing you can take with you and develop further from one lifetime to another. It is therefore the only thing which is real and permanent. Everything else is temporary and transient and merely an aid to our ultimate development and evolution. We are not in agreement with trepanning as an aid to psychic development. It is not necessary and many of its subsequent experiences are illusory. The third Eye cannot be opened surgically. All psychic things can be done without

boring a hole in his head- it is a false economy if you like, totally unnecessary and irrelevant. People's psychic abilities do decrease with age but only because they are not maintained and developed after childhood. That is nobody's fault but our own. We certainly find the new inquiring nature of CNK very refreshing and wish you continued success with it. (15 May 1979)

FROM ROY LAKE (Private UFO investigator) Dear Ted, Thanks for your magazine. As regards a display at the Chelmsford Town Show, Essex, I'm afraid this will not be as Barry King is now married and no longer lives in Dagenham. I'm still investigating on my own now and its been very quiet this end regarding UFO activity. Dr. Allen Hynek will be at the BUFORA meeting to be held in a Hotel in Marble Arch. It lasts for two days, Sunday and Monday, August bank holiday. The cost I believe for tickets is about £10 for the two days. For further information please check with this address: Colin Rillstone, UFO Congress, Grand Metropolitan House, Stratford Place, London, W.1. All the best, Roy. Give my regards to Rita. (24/4/79)

CNK SAYS TO ALL OTHERS WHO HAVE SENT US LEAFLETS SELLING THEIR WARES. WE DO NOT BUY ANYTHING FROM ANYBODY. Please do not waste your time and efforts in mailing adverts unless they are for publishing either as exchange or with cash. Thanks. It costs us more to produce CNK than we can ever buy from YOU!

From Beryl Wallace: Roehampton, London.

Dear Ted, Sorry not to have written earlier. Seems like the future is in computers. I am even saving for my own home computer, the one I want is either the Apple II or the PET. I was glad to see you are still interested in the anti-gravity motor, but no disappearing gricks. Its very illogical to copy those idiots on the UFO scene who shuck their families in order to carry the saucer message. I sometimes think the MLB are there to make people think twice about the way they are going. Sorry to nag you but you know I feel strongly about this kind of thing. Without giving too many secrets away, is your anti grav motor on the ion drive principle? In one of Brad Steiger's books 'Gods of Aquarius' he mentioned a woman who dreamt she was conversing with one of those blond types at a table and he was explaining an anti-grav drive to her, but she could not remember the formula^{he}/used when she woke up. There is a hell of a lot more I would like to talk about but my lunch hour is now up. Have a Happy Easter to all the family, Rita etc., All the best Beryl (Wallace). *SECRETS of my anti-gravity device? Shucks Beryl, everyone is onto the ion~~e~~ drive theory, even me now. I did have some success this week. Still a long way to go yet. I'll get to the moon around year 2100.. see you around then, OK? When you get your computer, ask it if it knows the way to the stars! Edward!

FROM LIONEL BEER, BUFORA (belated dated letter but relevant) 18 Ap. '79

Dear Ted, Thank you for your latest issue of CNK 22. which I have been perusing. I notice you mention Official UFO again. Some people have maliciously suggested that FSR is headed in the same direction! Personally I feel that they^{could}/certainly use more objectivity in some of their reports. BUFORA has also had enquiries from E.I. Sanarov, although it is not clear what his official status is. What a pity the Soviets operate such an oppressive system.

Re plane's instruments going haywire, it was reported to me unofficially that this was not an isolated incident, and there had been similar incidents turning up in official CAA reports which had gone unnoticed by the press, from the North Sea area. I regard the Aetherius Society and Ken Rogers equally as being a pain in the neck!

We have heard that Edoardo Russo of Milan, editor in chief of Clypeus, and Vicente-Juan Ballester, a leading Spanish researcher, are willing to give topical papers at the Congress in August.

Regards LIONEL.PS. You might be amused to learn that my father celebrated his 100th birthday on 7 February and gave a lecture to 200 people amongst other engagements that day!

*WELL DONE YOUNG MAN! (The average age for a human to live is now estimated by scientists to be 150. Modern food is killing us off, faster, however).

HUMANOID ENCOUNTER IN ITALY

FROM ITALY COMES A CASE SUMMED UP BY MARCO RAFFA of SHADO Italy NEWS. In a letter he says it could be a case of a CLOSE-ENCOUNTER of the Third Kind..and perhaps the fourth. Marco writes: "I'm enclosing a brief summary of the Zanfretta case, also pictures. If we had to write the entire story, with reports of investigators, text of three hypnotists, etc., it would need a book. And, as I write this, this case isn't yet closed." HUMANOID CASE:

It occurred on December 6, 1978. Fortunato Zanfretta 26, a private Security Guard was on his normal duty near Torriglia, a small town on the hinterland of Genoa. At 11.30 pm, he saw outside a house called "Villa Casa Nostra", 4 lights at about 100 metres from him. Thinking the lights belonged to thieves, he went to investigate. Then all power to his vehicle went out. The lights disappeared behind an angle of the house. When Zanfretta arrived he thought he would lay in waiting for the thieves, to surprise them. At that moment he felt something touching him on the back; so he turned immediately to see who was doing so, and with great astonishment, he found he was looking into the face of an unknown being. He described it firstly as a 'dark grey trunk' with strange 'undulations' all over it. He lifted his torch and saw an "ugly frightful face". As the beam of the torch hit the face of the being, it went out without reason. Zanfretta dropped the torch and it fell to the ground and switched on again. The being began to escape. The witness gave chase. Suddenly however, he saw a great light behind him. Turning around, he saw an enormous light, of triangular shape, which was rising from the back of the house, and that it quickly disappeared. The witness finally reached his car, and called for the second time to his Centre. This time all is operating and the calls of Zanfretta were being received by Genoa. The disconnected phrases of the Guard convinced his colleagues to send some cars to Torriglia, to help him. When they arrived at the place of the sighting, they found Zanfretta lying face down on the ground with the gun in one hand and a light in the other.

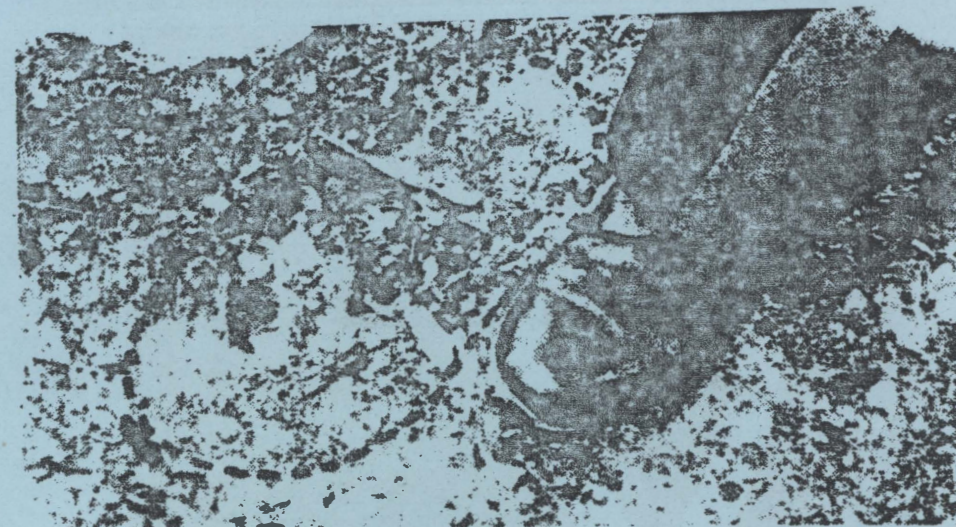

For two days the event remained secret; the police, investigated the place, discovered two tracks on the

ground, behind the house. The shape (like a horseshoe) and the

size (about 2,50 metres in diameter) of the tracks, were the same of other tracks discovered in South Italy four days after Zanfretta's encounter. Nobody knew anything of the event, until publication on December 8th by a Genoa Newspaper.

ON THE GROUND: the track discovered on second encounter.

Our group tried to contact other colleagues of Genoa zone but they were all away. Therefore we contacted Edoardo Russo of CLYPEUS, of Turin. Together we reached Genoa and interviewed the witness for about an hour. This report is based on this interview: While being interviewed we asked him if he would submit to an experiment in regressive hypnosis. At first, he refused due to the shock of the situation, but later Zanfretta did have regressive hypnosis. Under hypnosis Zanfretta referred to a lot of peculiarities, and the fact that, besides the "encounter" near the house, he had also been "abducted", by the strange being, and taken to a place which was "very

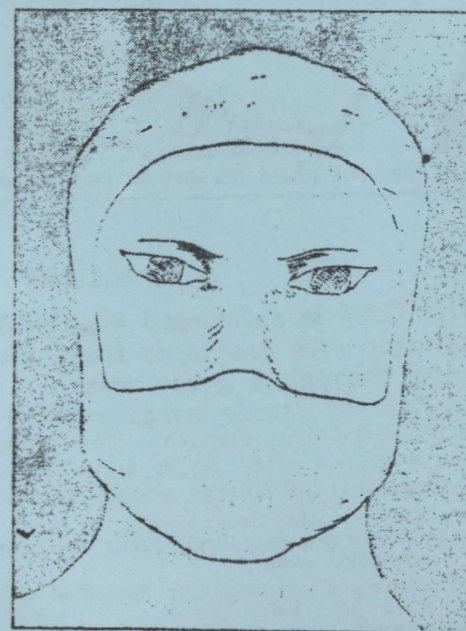

light and hot". The beings began to interrogate Zanfretta. He described them as being very tall, about 3 metres; skin was dark green (before hypnosis he said it was dark grey). This is a very interesting case, and as Marco says, it will fill up CNK itself. Translation by Marco Raffa.

MYSTERY OF A CLOSE ENCOUNTER WITH MEN IN A GREEN MIST

THE ALIEN: John's sketch

STAR TREK: John at the spot where he says he met the aliens

I went on a spaceship and met the 7ft aliens

By JOHN CLARE

JOHN DAY is convinced his family has had a close encounter with creatures from another planet after driving through a green mist.

He says the strange beings were 7ft tall, pink-eyed and communicated by telepathy. His amazing story emerged under hypnosis after John, a 33-year-old student and his wife Sue had nightmares about their experience.

He says: "I had never really believed in UFOs before this happened. Now I'm convinced aliens are here and only show themselves when they want to."

The couple's close encounter happened on a moonlight night as they drove to their Essex home.

They had been visiting Sue's parents in Harold Hill and the journey home normally takes 30 minutes. But after driving through the mist, John and Sue arrived to find three hours had mysteriously passed. The clock on their mantelpiece showed it was 12.45 a.m.--yet they had set out at 9.20 p.m. the previous evening. Then the couple began to have the same bizarre dream that they were on an operating table being examined by aliens. The dreams became so vivid the couple were afraid to go to bed. Finally, John contacted a group which researches UFOs, in the hope of finding out what really happened that night.

He was taken to one of Britain's leading hypnotists, dentist Leonard Wilder. Under hypnosis John recalled how a white light followed and finally zoomed across in front of his car on a lonely road. Then a beam of light transported the couple and their car aboard an alien spacecraft parked in a nearby field. John, a father of three, said:

"WE FOUND OURSELVES in a giant room. I was standing next to two or three beings. They were about seven feet tall, and all dressed in a one-piece costume. It was like a silver-grey stocking, with a balaclava type hood which came half way up their faces. The most startling thing about them was their eyes. They were bright pink, and they had no eyelids. I found I knew what they wanted me to do. I think they communicated with me by telepathy. I knew they wanted me to walk across the room, so I did. There was a doorway leading to another room. We all went through it.

This was obviously an examining room, and they asked me to lie on what looked like an operating table. I did so, and a metal arm swung over me.

MAGNETS

I got the impression it was scanning me. Then some smaller beings appeared. They were very squat and ugly, almost dwarflike. Only one seemed concerned with me. He kept prodding me with a pen-shaped object. After a while he seemed to have finished and I asked him if I could see around the ship. They agreed.

On a table, which was moulded into the wall, like the rest of the furniture, I saw a game. It was a pile of cubes, which had magnets on every side. The idea of the game was to build the small cubes into a big one. Towards the end of the tour the aliens left me alone in a room and suddenly an incredibly beautiful woman walked in. She looked just like an earth woman. She had bright gold hair, and all around her there was a grey mist. She really was beautiful. She walked towards me, and I took one step towards her. Then suddenly she vanished. Soon after the visit was over, and the next I knew I was driving down the

road again. The beings kept telling me they were friendly and I enjoyed it immensely."

Sue, a 29-year-old nursery nurse refused to be hypnotised because she did not want to relive the experience. But she told me: "When I lay on the operating table they painted me with a mauve liquid. Then they washed it off."

"They prodded me all over with a pen-like object, and didn't spare my blushes. Then I screamed. One of the tall beings came over and put his hand on my forehead. I went out like a light.

VANISH

"Later they took me on a tour around the ship. They showed me a screen and said, 'That is Earth.' "They pointed out England on it. Then we seemed to zoom in and they showed me where I lived.

"I told them I didn't want to go back I asked if I could stay on the craft, and they agreed.

"I saw John climb into the car, and it started to vanish. As it disappeared, I said I had changed my mind, and wanted to go back. Then I found myself sitting in the car."

Hypnotist Mr. Wilder, said: "I have no doubt that Mr. Day is telling the truth.

"I say this because when I first hypnotised him I conditioned him to tell only the truth.

Mr. Barry King, member of the UFO Investigations Network, said: We've made exhaustive inquiries and are convinced this couple had a close encounter.

"Certain aspects of it are similar to other abductions, like the design and furnishing of the rooms. We can find no reason to doubt its authenticity."

*BUT CNK has! There was one nagging doubt. It was the woman, when she refused to be hypnotised, how could she remember all that detail? Or have I missed some point or other-Editor.

Richard Magill was pointing at the door of a small locked office above the Wax Museum on Yonge Street. A placard on the door read: 'Flying Saucer-Hollow Earth Research Society' and Magill said:

"The guy who's into that, behind there, Ivan what's his name, has been in a spacecraft. He's really good. He's got rare manuscripts behind there relating to contacts with extraterrestrials from several hundred years ago." The Sun goes on in this: "It doesn't bother me if you think I'm a kook. I believe in this because it works. As for why it works, well, we'll never know. None of these psychic fairs makes a lot of money, you know. They're a new phenomenon. Twenty years ago hardly anybody even knew his sign. Soon, they'll know their visual basic aura colors, they'll be discussing where they are projected astrally."

In the Pyramid Power Unlimited office, Magill said George Dunn would be talking about the remarkable things pyramids can do.

"You put your cigarettes on a pyramid and suddenly they become milder," he said, with wonder in his voice. "Yes, there can be some kind of danger with them. George says if you watch television for three years in a pyramid you can go crazy!" Magill estimates there are 200 groups in this city who "are into all this". Then he said suddenly: "Did you hear about the flood we had here? It happened a couple of days ago, it was unreal, I tell you. The Royal Family downstairs in the museum got soaked. A lot of figures fell over. But you haven't heard the funny part. The figure of Richard Nixon survived! But he's a Capricorn, right, and they survive everything. Everyone else had to be rescued."

1976..OTTAWA CAN'T COPE WITH UFOs SO IT IGNORES THEM, The Federal government might be ignoring UFOs because it doesn't want to admit there's nothing it can do about them. Canada's leading authority on the subject said. "What government is willing to stick its neck out and admit aliens have direct access to our world and environment. It's much easier for the government to ignore them," said Arthur Bray, a former Canadian navy and air force pilot who is now manager of the occupational safety section of Canada's Safety Council. Bray said however, "It was given to the National Research Canada, who determined that in a report in 1968, that they were no threat to national security,." TORONTO STAR 1976

INTO THE PAST HISTORY of UFO COVER-UPS:

Source: Unknown, but a newspaper marked Classified:

By STEVE WOOLEY . ON APRIL 24, 1964, there occurred one of the
most famous "close encounters" in the history of UFO sightings.

It happened near the small desert town of Socorro in New Mexico
and involved at least 13 witnesses-the most important being a
state policeman and a marshall, one Lonnie Zamora. It was Zam-
ora who got nearest to a whitish-metallic, egg-shaped craft which
had landed on leg-like supports in a ravine to the south-west of
the town. Looking from his patrol car, Zamora was able to see
two small humanoid figures dressed in something "resembling white
coveralls" and standing near to the craft, apparently inspecting
it from the outside. Observing them from a distance of about
450 feet, the policeman decided he wanted to make a closer look:
a move which meant negotiating a dip in the ground and temporar-
ily losing sight of his objective. By the time he got to a mere
50ft away from the object its occupants had seemingly retreated
inside it. And when he tried to approach it on foot, the craft a-
bruptly took off, with an ear-splitting roar and a bright blue f
flame-like exhaust. Agfasinating case, and one which consider-
ably shook up the normally phelgmatic Zamora. But, as it happened
14 years ago, does it have any relevance to UFO research today?

The answer is a resounding "yes" according to scientific UFO
investigator Ray Stanford in his book, Socorro Saucer(Fontana
85p) a painstaking, factual and closely researched work by a
researcher personally involved in the aftermath of the Socorro
incident. It does demonstrate conclusively that something DID
land at Socorro - and that the military authorities pretty quick-
ly tried to hush it up, using some highly dubious methods to
achieve their aim. (Interestingly, Socorro is not far from the
White Sands missile range or the U.S. Air Force's Holloman base)

The full truth will only emerge, says Stanford, if the U.S. Con-
gress undertake the type of strong and insistent inquiry into

what happened as they did on the Watergate affair. And it is
crystal clear that such an inquiry is just what the researcher
hopes to precipitate through the publication of his book.
*This report may have been from the Yorkshire area. As the egg-
shaped craft took off with a roar, I can only assume it was. A)
an earthly man-made machine from the White Sands testing fange,
or B). they didn't know about it and that UFOs use rocket-like
propulsion at times when they are in trouble with their anti-
gravity mechanisms. (my guess)! Perhaps a temporary measure on
their part.

AMATEUR RADIO IN SPACE. Evening News 14/2/79 via O' Hare:
BRITIAN'S first amateur spacecraft is to go into orbit in two
years' time. Built at a cost of £150,000, it will be filled
with a mass of electronic equipment. It is being developed by
the University of Surrey at Guildford, to help amateur radio
enthusiasts. Scientists want to know what happens to radio trans-
missions when they pass through the upper layer of the atmosphere.
There have been other bukt in America, Germany, Canada, Japan,
and Australia but have been built soely for extending the range
of amateur transmissions. Britain's craft will, like the rest,
have a piggy-back launch by NASA. They are launched when NASA is
sending up a satellite and have room on board.
